

Our Employee Assistance Program (EAP) and WorkLife Services promote high-performing work cultures by helping employees be more engaged, resilient and productive.

Employers ranked stress as the biggest risk to workforce productivity in a recent survey.¹ An Optum™ EAP addresses what causes stress by providing caring, experienced support to employees and managers in handling life's challenges. Our EAP also helps multiply your investment in health-and-wellness programs. Our specialists, who know and understand each employer's benefits, guide employees appropriately to other sources of help available to them.

Our EAP master's-level specialists help employees get the support they need. We focus on maximizing opportunities for all employees, not just those in crisis, by:

Offering employees and managers **unlimited consultations with EAP specialists and management consultants, plus referrals for face-to-face counseling**

24/7

The Optum EAP gets **high satisfaction** scores, **improves productivity** and helps employers **manage health care costs** through early intervention and treatment.

When combined with an Optum behavioral health benefit plan, an Optum EAP can **reduce an employer's total overall behavioral health costs by more than**

1/3²

Specialty Help Centers

INSTANT HELP

We can connect employees *immediately* by phone to a professional for help with many matters, such as relationships, family and parenting, work concerns, and grief and loss.

Management Services

STRONGER ORGANIZATIONS

Talk to a management consultant, get training for employees, call when a critical incident threatens to disrupt your workplace.

Ideas for Promotion

ENGAGED EMPLOYEES

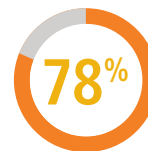

Find ideas for campaigns, handouts, newsletters and more on liveandworkwell.com, accredited by URAC. Use our unique digital engagement hub to promote all your EAP has to offer.

WorkLife Services

HAPPY EMPLOYEES

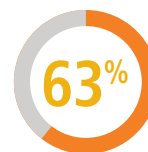

Win your employees' appreciation: add WorkLife Services to your EAP. Our specialists find availability, information and costs for more than 100 services in employees' own neighborhoods.

of all presenting issues are **resolved within our EAP**, without referral to additional behavioral health resources³

of those who contacted our EAP said they were **satisfied and would use the service again**⁵

decrease in **days absent** among employees who used our EAP⁴

decrease in days affected by **presenteeism**⁴

¹Towers Watson and the National Business Group on Health, 2013/2014 Staying @Work Report.

²An Optum analysis of 2012-2013 behavioral health claims of large national employers found that when employees used both their Optum EAP and behavioral health benefits, their outpatient costs were 42 percent lower on average and their number of outpatient visits were 31 percent lower on average. Sivalop and Motz, 12/16/13
